

Which Spectral is best for you?

SIGNIFICANT RESULTS AT ANY STAGE OF HAIR LOSS OR THINNING

Spectral.DNC-N®

Men

- Beginning or moderate stages of hair loss
- Preventive and corrective therapy
- Maintenance after regrowth
- Receding hairline
- Eyebrow regrowth

Women

- Severe or visually noticeable stages of hair loss
- Corrective therapy
- Receding hairline
- Eyebrow regrowth

Spectral.F7®

Men and women

- First to incorporate astressin-B, a complex peptide
- All stages of hair loss or thinning
- Efficacy booster for other topical therapies such as Spectral.DNC-N or Spectral.RS
- Corrective therapy for stress-induced hair-loss
- Mitigator of the harmful effects caused by stress hormones, which may lead to hair thinning

Spectral.RS®

Men and women

- Preventive and corrective therapy for evenly distributed hair thinning
- Restoration of hair-strand thickness and volume
- Hormone-related cases
- Post-natal shedding

Spectral.DNC-N® versus other topical brands

Spectral.DNC-N

- First treatment to employ Nanoxidil, with a lower molecular weight than minoxidil
- Nanosome encapsulation system to transport compounds deep into follicles
- Long 12 hours of growth performance
- Procyanidin B-2 for hairline as well as vertex
- Retinol for better absorption of all compounds
- Adenosine for cell repair and signaling
- Aminexil to oppose perifollicular fibrosis
- Copper peptides to counter inflammation
- Herbal extracts to improve scalp condition

Other topical brands

- Commercial-grade minoxidil, with chemical solvents and scalp irritation
- No deep-delivery system; little or no absorption
- Short 15 minutes of effect

New Nanoxidil versus old minoxidil

New Nanoxidil

Nanoxidil is the new ion-channel opener, built around a molecule similar to minoxidil but with a lower molecular weight and other advantages.

- New and improved ion-channel opener
- Multiple mechanisms of action
- Lower molecular weight
- Unlikely to cause irritation
- Few side effects or drug interactions

For multiple mechanisms of action, additional ingredients in Spectral.DNC-N enhance the activity of Nanoxidil.

If you tried minoxidil before but did not get the desired results, try Nanoxidil now. If just beginning therapy, try Nanoxidil first.

Old minoxidil

- The previous standard, before the more recent development of Nanoxidil
- Just a single mechanism of action
- A higher molecular weight
- More likely to cause irritation and swelling
